Bio-Booster™ Cetane Improver **Soy-Based**

PRODUCT DESCRIPTION

Bio-Booster is a soy-based cetane improver that is completely soluble in fuels and increases diesel fuel ignitability, which is beneficial in many critical conditions. It is compatible with most commonly used diesel fuel additives and will not detract from fuel stability, lubricity, water tolerance, or corrosion protection. Blend **Bio-Booster** in terminal tanks, underground tanks, or directly into vehicle fuel tanks. Many cost effective benefits will be achieved when **Bio-Booster** is utilized in your fuels.

PROVEN BENEFITS

- Easier cold weather starting with faster warm-up rates
- Reduced time and lower cranking speed to start
- Smoother, quieter more efficient severe-duty operation
- Reduces misfiring at lower inlet air temperatures
- Lowers rate of pressure rise in cylinders during combustion
- Better combustion, fewer emissions at low-duty operations
- Increases BTU's/gallon and increases fuel economy
- Excellent compatibility with Bio-Power (Summer & Winter Conditioners)

APPLICATIONS

**All commercial vehicles on and off highway
Diesel Passenger cars and trucks**

**Stationary Equipment
Railway and Marine Engines**

DIRECTIONS

Bio-Booster Cetane Improver is recommended at 1 gallon per 250 to 500 gallons of diesel fuel. However, fuels have a wide range of quality and characteristics, the exact percentage which will be beneficial and cost effective must be based on ambient temperatures and diesel fuel quality.

- **Average of fuels tested indicated that 1 gallon per 250 gallons of fuel will raise Cetane number by 5 points**
